LOCATIONS SERVED

Washington, DC	Montgomery Co.
Alexandria, VA	Prince George's Co.
Arlington, VA	Frederick Co.
Fairfax, VA	Arlington Co.
Ashburn, VA	Fairfax Co.
Baltimore, MD	Prince William Co.
Frederick, MD	Loudoun Co.

Revelation AV + Automation designs, installs, and programs integrated AV and control systems for government agencies to enhance communication, collaboration, and operational efficiency. Optimize your conference rooms; create interactive training centers and engaging reception areas; and light outdoor walkways, stairways, and facility perimeters for safety. *Revelation AV+Automation is a wholly owned subsidiary of Revelation Services, LLC. (established 2013).*

CORE COMPETENCIES

AV System Design and Integration

Design, procurement, installation, and programming of audio, video, and control systems for conference rooms, training facilities, and collaborative workspaces

Large display mounting with concealed infrastructure and professional calibration

VR-assisted space planning to optimize viewing angles, audio quality, and camera coverage

Network Infrastructure and Telecommunications

Structured cabling installation (Cat6, fiber optic) for new construction and retrofits

Enterprise WiFi design, deployment, and troubleshooting

VoIP telephony solutions and legacy POTS system integration

Low-voltage wiring for security and communication systems

Outdoor Security Lighting

Design and installation of LED lighting systems for walkways, stairways, parking areas, and building perimeters

Automated controls for enhanced security and energy efficiency

Integrated Control and Automation

Programming and deployment of enterprise control systems (RTI, Control4, URC, Savant)

Zone audio distribution for multi-room applications

Interactive display systems (smartboards, digital signage)

Certified Equipment Sales, Delivery, and Installation

Video Systems: Flat panel displays, projectors, motorized screens, outdoor displays, video walls, digital signage

Audio Systems: Ceiling/in-wall speakers, soundbars, conference speakerphones, microphones, paging/intercom systems

Collaboration Technology: Interactive smartboards, touch displays, wireless presentation systems, cameras, huddle rooms

Network Equipment: Managed switches, wireless access points, fiber transceivers, PoE systems, structured cabling infrastructure

Outdoor Lighting: LED accent/path lights, spotlights, downlights, wall washers, architectural lighting, step/deck lights

Control Systems: Touch panels, occupancy sensors, scheduling interfaces, mobile applications, system processors

KEY DIFFERENTIATORS

12+ years of proven performance

Complete service for AV, telephony, networking, automation control, and outdoor lighting

Single point of contact for turnkey solutions: design, procurement, installation, configuration, testing, and ongoing support

Fully insured with comprehensive liability coverage, including specialty protection for sensitive equipment and facilities

CEDIA membership for industry-leading technology solutions and integration
